REQUEST FOR RECONSIDERATION OF PETITION DECISION

Mail Stop PCT
Commissioner for Patents
Office of PCT Legal Administration
Alexandria, VA 22313-1450

Dear Sir:

This request for reconsideration is in response to the Decision mailed March 3, 2004 ("the Decision"), dismissing Applicant's petition under 37 CFR 1.47(a) ("the Petition") filed on August 19, 2002. In the Petition, Applicants requested that the Notification of Acceptance of the application be affirmed despite the missing signature of Mr. Ali Jalali. The Petition was dismissed because the Petition lacked adequate factual proof that the missing inventor refused to join in the application or cannot be reached after diligent effort.

Signature of Mr. Jalali

Subsequent to the filing of the Petition, the signature of Mr. Jalali was obtained. A Declaration and Power of Attorney containing Mr. Jalali's signature was filed by Applicant on November 7, 2002. A copy of the executed Declaration and Power of Attorney containing Mr. Jalali's signature filed on November 7, 2002 is enclosed. In addition, the original Declaration and Power of Attorney signed by Mr. Jalali is also enclosed. As a result, the Petition is moot.

Relief Requested

Applicants request that the Decision mailed March 3, 2004 be vacated, and that a new Notice of Acceptance of Application Under 35 U.S.C. 371 (Form PCT/DO/EO/903) be issued. Further, return of this application to the Examiner for consideration of Applicant's response filed on September 26, 2003 is also requested.

Any question concerning this paper should be directed to the attention of the undersigned at the number provided below.

Dated: May 3, 2004

Respectfully Submitted,

United States Patent Application

COMBINED DECLARATION AND POWER OF ATTORNEY

As a below named inventor I hereby declare that: my residence, post office address and citizenship are as stated below next to my name; that

I verily believe I am the original, first and sole inventor (if only one name is listed below) or a joint inventor (if plural inventors are named below) of the subject matter which is claimed and for which a patent is sought on the invention entitled: MULTICARRIER MODULATION USING WEIGHTED PROTOTYPE FUNCTIONS

The specification of which

- a. ☐ is attached hereto
- b. ☒ was filed on December 29, 1999 as application serial no. 09/446,958 and was amended on (if applicable) (in the case of a PCT-filed application) described and claimed in international no. PCT/FR98/01398 filed June 30, 1998 and as amended on (if any), which I have reviewed and for which I solicit a United States patent.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, § 1.56 (attached hereto).

I hereby claim foreign priority benefits under Title 35, United States Code, § 119/365 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on the basis of which priority is claimed:

- a. ☐ no such applications have been filed.
- b. ☒ such applications have been filed as follows:

1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted. If the information is not material to the patentability of any claim remaining under consideration in the application, there is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim potentially defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim;
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.
